

CONTENTS

	Preface	i-ii
1	Failure Time Prediction Model for an Injection Molding System <i>Pritam Ranjan, Arnab Koley, Sandip K. Pal and Debasis Kundu</i>	1–11
2	On Bivariate Weibull Frailty Model <i>Debasis Kundu</i>	13–30
3	Fondly Remembering Two Interesting Collaborations <i>A. Goswami</i>	31–41
4	On Exploring Tails via Tail Equivalence <i>Sreenivasan Ravi</i>	43–50
5	Advances in Stepped Wedge Design: A Comprehensive Review <i>Soumadeb Pain and Satya Prakash Singh</i>	51–66
6	Challenges in Flexible and Scalable Modeling of Point-referenced Spatial Data <i>Suman Guha</i>	67–75
7	Use of Designs for Statistical Experiments in Constructing Cryptographic Schemes <i>Mausumi Bose</i>	77–86
8	Large Language Models in Practice: Training Paradigms, Knowledge Systems, and Production-Scale Deployments <i>Utkarsh Tripathi</i>	87–100
9	A Comparative Study of Estimation Methods for Nakagami Distribution in Reliability Analysis <i>Rahul Gupta and Bhagwati Devi</i>	101–120
10	Predicting Stock Market Crash with Bayesian Generalised Pareto Regression <i>Sourish Das</i>	121–134
11	Unraveling Biological Complexity: AI and Statistical Approaches to Multi-Omics Data Integration <i>D. C. Mishra, Shesh Nath Rai, Mamatha Y. S., K. K. Chaturvedi, Sudhir Srivastava, Neeraj Budhlakoti1 and Girish Kumar Jha</i>	135–152
12	An Overview of Bayesian Semiparametric Approaches for Genetic Association Studies <i>Durba Bhattacharya and Sourabh Bhattacharya</i>	153–166

- 13 Predictive Modeling of Maize Yield in Jammu Subtropical Zone using Weather Data and Penalized Regression 167–176
Manish Sharma, Amandeep Verma, Nishant Jasrotia, Sushil Sharma and Divyam Sharma
