Volume 18, No. 2 (New Series) 2020

CONTENTS

Special Issue "Challenges and Opportunities in Statistical Data Designing and Inference in the Emerging Global Scenario" in honour of twin statisticians (brothers) Bimal and Bikas Sinha on their 75th Birthday

Contents		i-ii
Foreword		iii
Message		v-vii
Preface		ix-x
The Sinha Brothers (Bimal and Bikas) – The Twin Statisticians		xi-xxx
1.	Wanted! A Mathematician *Jyotirmoy Sarkar*	1-14
2.	On the Status of Variance Balanced Block Designs in the Presence of Both-sided Neighbour Effects: Two Examples *Sobita Sapam and Bikas Kumar Sinha*	15-29
3.	Simple Proof of the Non-existence of Some Affine Resolvable SRGD Designs *Satoru Kadowaki and Sanpei Kageyama*	31-34
4.	Upper and Lower Bounds of the Dispersion of a Mean Estimator in the Growth Curve Model *Shinpei Imori and Dietrich von Rosen*	35-44
5.	Selection of Divergence Priors in the Presence of Nuisance Parameters *Ruitao Liu and Malay Ghosh*	45-65
6.	Discriminating Between Superior UE(s^2)-optimal Supersaturated Designs *Feng- Shun Chai*, *Ashish Das*, *Rakhi Singh and John Stufken*	67-74
7.	A New Family of Probability Density Functions With Deflated Tails *Avinash D. Dharmadhikari, Sanjeev V. Sabnis and Bikas K. Sinha*	75-84
8.	Block Total Response Technique for Quantitative Sensitive Features in a Finite Population *Karabi Nandy and Bikas K. Sinha*	85-95
9.	The Simultaneous Assessment of Normality and Homoscedasticity in One-Way Random Effects Models *Ye Yang and Thomas Mathew*	97-119
10.	A Nonparametric Bayesian Analysis of Response Data with Gaps, Outliers and Ties *Jiani Yin and Balgobin Nandram*	121-141
11.	From Experimental Design to Proportional Representation – A Tribute to Bikas Kumar Sinha and Bimal Kumar Sinha on Their 75th Birthday *Friedrich Pukelsheim*	143-154
12.	Identification of Multiple Unusual Observations in Spatial Regression *A.H.M. Rahmatullah Imon and Ali S Hadi*	155-162
13.	Quantifying Spatial and Temporal Relationships Among Tree-Ring Records *Megan Heyman, Scott St George and Snigdhansu Chatterjee*	163-185
14.	Using Conditionally Specified Joint Distribution to Simultaneously Model Discrete and Continuous Data *Nadeesri Wijekoon and Nagaraj K. Neerchal*	187-205

15.	Bayesian Mixture Designs for Hypothesis Testing *N. K. Mandal and Manisha Pal*	207-221
16.	A Comparative Study of Approximate Bayesian Computation Methods for Gibbs Point Processes *Jiaxun Chen, Athanasios C. Micheas and Scott H. Holan*	223-248
17.	Some Computational Issues Related to Common Clustering Techniques *Asis Kumar Chattopadhyay*	249-261
18.	Estimation and Sample Size Calculation for Service Utilization Data *Dulal K. Bhaumik and Subhash Aryal*	263-274
19.	U-Statistics CLT Using Cumulants and a Free Version *Arup Bose and Apratim Dey*	275-286
20.	Inference on Stress-Strength Reliability of a System with Two Independent Stresses under Generalized Uniform Distribution *Manisha Pal and Montip Tiensuwan*	287-298
21.	A Generalized Inferential Model for Meta-Analyses Based on Few Studies *Joyce Cahoon and Ryan Martin*	299-316
22.	Horseshoe and Strawderman-Berger Estimators for Non-negative Normal Means *Neha Agarwala and Junyong Park and Anindya Roy*	317-332
23.	Finite Mixture Modelling of Survival Data: With Applications to Pensioner Lifetime *Jyrki Möttönen, Janne Salonen, Tapio Nummi and Timothy E. O'Brien*	333-351
24.	Estimation of Kurtosis Parameters of Multivariate Populations *Nighat Zahra, Muhammad Kashif Ali Shah and S. Ejaz Ahmed*	353-368
25.	Statistical Validity and Consistency of Big Data Analytics: A General Framework *Bikram Karmakar and Indranil Mukhopadhyay*	369-381
26.	Finite Sample Properties of A-Optimal Designs for Binary Response Data *Rajesh Ranjan Nandy, Srichand Jasti and Karabi Nandy*	383-391
