

CONTENTS

1.	R-optimal Designs for Logistic Regression Model in Two Variables <i>Mahesh Kumar Panda and Tofan Kumar Biswal</i>	1–12
2.	Estimation for the Length Biased Log-Logistic Model under Adaptive Progressive Type II Censoring <i>Ranjita Pandey, Pulkit Srivastava and Sweta Shukla</i>	13–32
3.	R-optimal Designs for Gamma Regression Model with Two Parameters <i>Mahesh Kumar Panda, Tofan Kumar Biswal and V. K. Gupta</i>	33–53
4.	Discrete Type I Half-Logistic Weibull Distribution and its Properties <i>M. Girish Babu and K. Jayakumar</i>	55–78
5.	Bulk Queuing Model with Reneging of Customers and their Retention <i>Shejal Gupta, Pradeep K. Joshi and K. N. Rajeshwari</i>	79–88
6.	Inference Techniques, Properties, and Applications of the T-Marshall-Olkin X Family of Distributions <i>Meenu Jose and Lishamol Tomy</i>	89–122
7.	Competing Risks Models with Multistate and Intermediate States <i>A. M. Rangoli, A. S. Talawar and R. P. Agadi</i>	123–137
8.	Extinction and Stationary Distribution of a Stochastic SEII _a I _q HR Epidemic Model with Intervention <i>Tamalendu Das, Tridip Sardar and Sourav Rana</i>	139–175
9.	Sample Size Determination for Clinical Studies when Crisp Inputs are not available <i>Sai Sarada Vedururu, R. Vishnu Vardhan and K.V.S. Sarma</i>	177–187
10.	Construction of Order-of-Addition-Orthogonal Array Designs <i>Muhsina A., Baidya Nath Mandal, Rajender Parsad and Sukanta Dash</i>	189–196
11.	A Hybrid ARIMA-GARCH Type Copula Approach for Agricultural Price Forecasting <i>B. Manjunatha, Ranjit Kumar Paul, Ramasubramanian V., Amrit Kumar Paul, Md. Yeasin, Mrinmoy Ray, G. Avinash and Chandan Kumar Deb</i>	197–216

12.	Environmentally Responsible Index Tracking: Maintaining Performance while Reducing Carbon Footprint of the Portfolio <i>Lakshmi M. V., Soudeep Deb and Rituparna Sen</i>	217–223
13.	A Comprehensive Review of Data Science, Artificial Intelligence, and Big Data Analytics in Indian Official Statistics <i>Prasily P. and Manoharan M.</i>	225–247
14.	Three-State Markov Probability Distributions for the Stock Price Prediction <i>Tirupathi Rao Padi, Sarode Rekha, and Gulbadin Farooq Dar</i>	249–272
15.	An Economic Analysis of Two-Node Tandem Queue with Feedback <i>Ankita Roy Chowdhury and Indra</i>	273–281
16.	Bayesian Estimation of Scale Parameter of Inverted Kumaraswamy Distribution under Various Combinations of Different Priors and Loss Functions <i>Ableen Kaur, Parmil Kumar and Hemani Sharma</i>	283–301
17.	Determining Optimal Threshold and Some Inferential Procedures for a Skewed ROC Model in the Binary Classification Framework <i>Sandhya Singh, Saebugari Balaswamy and R. Vishnu Vardhan</i>	303–320
18.	Nonparametric Estimation of Entropy-Related Measures with Length-Biased Data <i>R. Dhanya Nair and E. I. Abdul Sathar</i>	321–334
19.	Mathematical Model for Spread of COVID-19 Virus using Fractional Order Approach <i>Gajanan S. Solanke and Deepak B. Pachpatte</i>	335–346
20.	Neutrosophic Marshall Olkin Extended Burr-XII Distribution: Theoretical Framework and Applications with Multiple Survival Time Data Sets <i>Shakila Bashir, Bushra Masood and Muhammad Aslam</i>	347–364
21.	Prediction of COVID-19 Disease Progression in India under the Effect of National Lockdown <i>Sourish Das</i>	365–383

SHORTER COMMUNICATION

22.	Understanding Fellegi Scheme for Sample Size Three <i>Yumnam Menon Singh and Opendra Salam</i>	385–388
