Special Issue on Survey Methodology and Applications
(To felicitate Professor J.N.K. Rao on his 80th birthday)

Preface		
1	J.N.K. Rao – A Tribute - <i>V.K. Gupta and Rahul Mukerjee</i>	1–19
2	Sample Survey Theory and Methods: Past, Present and Future Directions - <i>J.N.K. Rao and Wayne A. Fuller</i>	21–35
3	Determining the Size of a Sample to Take from a Finite Population - <i>Arijit Chaudhuri and Tathagata Dutta</i>	37–44
4	Sample Design for the Survey of Enterprises in Philippines - <i>G. Hussain Choudhry</i>	45–56
5	Adjustment for Unit Non-response in Survey Sampling: A Selective Review - <i>Yogendra P. Chaubey</i>	57–70
6	Small Area Estimation of Gender-Based Violence: Rape Incidence Risks in Uttar Pradesh, India - <i>G. Vicente, T. Goicoa, A. Puranik and M.D. Ugarte</i>	71–90
7	Revisiting a General Pattern of Domination Using the Graybill–Deal Estimator - <i>A.S. Hedayat, Bikas K. Sinha and Keyu Nie</i>	91–103
8	Regression Analysis of Binary Data from Complex Surveys with Misclassification in Ordinal Covariates - <i>Zhijian Chen, Harold Mantel, Changbao Wu and Grace Y. Yi</i>	105–122
9	Joint Imputation Procedures for Categorical Variables - <i>Helene Chaput, Guillaume Chauvet, David Haziza, Laurianne Salembier and Julie Solard</i>	123–144
10	Controlled Sampling – A Review - <i>Arun Nigam, Neeraj Tiwari and B.N. Mandal</i>	145–169
11	Bayesian Logistic Regression for Small Areas with Numerous Households - <i>Balgobin Nandram, Lu Chen, Shuting Fu and Binod Manandhar</i>	171–205
12	Bayesian Predictive Inference for Finite Population Quantities under Informative Sampling - <i>Junheng Ma, Joe Sedransk, Balgobin Nandram and Lu Chen</i>	207–226
13	A Random Effect Model Approach to Survey Data Integration - <i>Eunseon Gwak, Jae Kwang Kim and Youngwon Kim</i>	227–243

14	A Conditional Empirical Likelihood Based Method for Model Parameter Estimation from Complex Survey Datasets - <i>Sanjay Chaudhuri and Mark S. Handcock</i>	245–268
15	Selection of Small Area Estimators - <i>Maria Jose Lombardia, Esther Lopez-Vizcano and Cristina Rueda</i>	269–288
16	On Modifications to Linking Variance Estimators in the Fay-Herriot Model that Induce Robustness - <i>Snigdhasu Chatterjee</i>	289–303
17	Observed Best Prediction for Small Area Estimation: A Review - <i>J. Sunil Rao</i>	305–314
18	Polya Tree Priors for the Proportional Hazards Model - <i>Lei Huang and Malay Ghosh</i>	315–337
19	Population Estimation when Median of the Study Variable is Known - <i>S.K. Yadav, Sat Gupta and Sheela Misra</i>	339–350
20	Poverty Indicators at Local Level: Definitions, Comparisons in Real Terms and Small Area Estimation Methods - <i>Luigi Biggeri, Caterina Giusti, Stefano Marchetti and Monica Pratesi</i>	351–364
21	Estimation of Finite Population Variance Under Systematic Sampling Using Auxiliary Information - <i>Uzma Yasmeen, Muhammad Noor-ul-Amin and Muhammad Hanif</i>	365–373
22	Robust Mean Squared Error Estimation for the ELL-based Poverty Estimates Under Heteroskedasticity - An Application to Poverty Estimation in Bangladesh - <i>Sumonkanti Das, Hukum Chandra and Ray Chambers</i>	375–397
23	Variance Modeling for Domains - <i>Sam Hawala and Partha Lahiri</i>	399–409
