

CONTENTS

1.	Analysis of River Water Quality Using Geo-Spatial and Temporal Data: A Case study <i>K. Muralidharan, Shrey Pandya, Aiman Shaikh, Parth Patel and Jayshree Vanzara</i>	1-15
2.	Estimating Finite Population Mean using Multiple Parameters of an Ancillary Variable <i>Deepak Singh, Rohini Yadav and Rajesh Singh</i>	17-36
3.	Prediction Intervals in ARCH Models using Sieve Boot strap Robust against Outliers. <i>Samir Barman, Ramasubramanian V., Mrinmoy Ray and Ranjit Kumar Paul</i>	37-58
4.	Estimation of AUC of Bi-Generalized Half-Normal ROC Curve <i>Dashina P. and R. Vishnu Vardhan</i>	59-71
5.	Estimation of the Finite Population Mean in Stratified Random Sampling under Non- Response <i>Zakir Hussain Wani and S.E.H. Rizvi</i>	73-98
6.	COVID-19 Cumulative Death Prediction in Two Most Populated Countries by Fitting ARIMA Model and Linear Regression <i>Shagun Sachdeva and Ravinder Singh</i>	99-106
7.	Dealing with the Imperfect Frame Arising Due to Rare Outdated Units from Finite Population <i>Neelam Kumar Singh</i>	107-120
8.	Heterogeneous Auto-Regressive Modeling based Realised Volatility Forecasting <i>G. Avinash, Ramasubramanian V. and Badri Narayanan Gopalakrishnan</i>	121-140
9.	Resolvable and 2-Replicate PBIB Designs based on Higher Association Schemes Using Polyhedra <i>Vinayaka and Rajender Parsad</i>	141-154
10.	A Bimodal Extension of Suja Distribution with Applications <i>Samuel U. Enogwe, Emmanuel W. Okereke and Gabriel C. Ibeh</i>	155-173
11.	Evaluation of the Status of Frigate Tuna Auxis thazard (Lacepede, 1800) Fishery in the Tamil Nadu Coast of India <i>R. Abinaya and M. K. Sajeevan</i>	175-192

12.	The gLinear Failure Rate Distribution: A New Mixture with Bayesian and Non-Bayesian Analysis <i>R. M. Mandouh</i>	193-211
13.	Accelerated Life Test Acceptance Sampling Plans for the Weibull Distribution with Constant Acceleration using EWMA and Modified EWMA Statistics <i>D. P. Raykundaliya, Sanjay Christian and Jyoti Divecha</i>	213-235
14.	Agricultural Price Forecasting Based on Variational Mode Decomposition and Time-Delay Neural Network <i>Kapil Choudhary, Girish K. Jha, Ronit Jaiswal, P. Venkatesh and Rajender Parsad</i>	237-259
15.	Number of Overlapping Runs Until a Stopping Time for Higher Order Markov Chain <i>Anuradha</i>	261-280
16.	Topp-Leone Generated q-Weibull Distribution and its Applications <i>Nicy Sebastian, Jeena Joseph and Sona Santhosh</i>	281-299
17.	Modeling Bivariate Survival Data By Compound Frailty Distributions <i>David D. Hanagal and Alok D. Dabade</i>	301-318
18.	A Hybrid Regression Model for Cashew Nuts Price Prediction <i>Satyanarayana and Ismail B.</i>	319-327
